Expert Reports and Statements

Patent Analysis

Forensic Engineering

Environmental Testing

Formation of Technical Cases

Courtroom Testimony

Innotec offers a high-quality Expert Witness service delivered by recognised industry experts in the fields of electronics, microelectronics and embedded software.

Innotec consultants have significant hard-won experience as expert witnesses. Working for leading law firms in support of their clients, Innotec consultants have been involved in some of the largest and most complex technology disputes brought before the courts.

Innotec's Expert Witness experience includes:

- **Intellectual property cases**, where Innotec has been retained in complex disputes regarding many different aspects of intellectual property infringement involving electronics, microelectronics, software and associated products
- **Professional negligence cases**, where Innotec's forensic engineering skills have been key in analysing complex product designs to establish whether they meet contracted standards

Innotec has helped its clients by:

- Producing **expert reports and statements** relating to complex technical issues
- Undertaking **forensic engineering** on behalf of clients by analysing systems and equipment to establish the causes of failure
- Performing **environmental tests** to assess conformance with specifications of systems and equipment
- **Analysing patents** in support of Intellectual Property actions
- Providing **advice on the formation of cases** for clients in the early stages of potential litigation
- Providing **courtroom testimony** on behalf of clients

In summary, **Innotec** has the proven expertise and experience to support your case in electronics, microelectronics or embedded software.
